

# QUALIS JOURNAL

## How to identify the new qualis?

Qualis identification for Journals can be verified by Scopus or the Web of Science. Always check on both platforms, as there may be differences between the percentiles. However, always calculate Qualis by the highest percentile value found!

### - Identify the Percentile -

#### SCOPUS

## 1 SCOPUS - SOURCES 2 IDENTIFY PERCENTILE

Access Scopus - Sources and in the search field, enter the name of the Journal you want to identify the new qualis.

In the search result, look for the name of the Periodical and identify in the "**Highest percentile**" column the value of its percentile.

#### WEB OF SCIENCE

## 1 WEB OF SCIENCE 2 IDENTIFY PERCENTILE

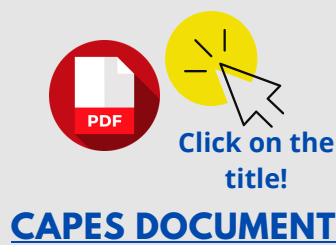

- Access the "**Journal Citations Report**" tab, then type the name of the journal and search.
- The page with the "Journal Profile" or a list with the search results will appear (click on the name of the journal).

Select the "Rank" tab (almost at the bottom of the page) and look for the "JCR Impact Factor". The result is the highest value of the "JIF percentile" column (s) in the most recent year line.

### - Applying the Rule -

## 3 WITH THE VALUE OF THE HIGHEST PERCENTILE, APPLY THE FOLLOWING RULE TO IDENTIFY THE QUALIS OF THE JOURNAL:

- $\geq 87,5\%$ : **A1**
- $\geq 75\%$ : **A2**
- $\geq 62,5\%$ : **A3**
- $\geq 50\%$ : **A4**
- $\geq 37,5\%$ : **B1**
- $\geq 25\%$ : **B2**
- $\geq 12,5\%$ : **B3**
- $< 12,5\%$ : **B4**

- "As a form of induction, the national journals published by SBC were added at 2 levels (5 journals) in relation to the one calculated by the methodology described in Section 2 (7 of 539 journals - 1.3% of journals classified by Computation)."

If you know the true qualities of these periodicals that have been inducted, let me know that I update

**ATTENTION: In Scopus, when the journal has CiteScore and JIF, it is considered for stratification purposes, the highest percentile value among them. In other words, the new Qualis for Journals applies to any area, whether in Computing or not. For example, when the journal has more than one Percentile value, per area, the highest value is always valid, even if this highest value is not from Computation.**
